

STOP LEAKS. PERMANENTLY.

**Universal
Products**
Inc.

Red Angel A/C Stop Leak & Conditioner has the remarkable ability to repair and seal leaks in condensers, evaporators, connection hoses and gaskets & o-rings. It contains no solid or particulate matter that will clog your A/C system or harm the recovery unit. Red Angel forms a chemical weld sealing leaks in R-134a systems. It's safe and easy to use and best of all — it's a permanent seal. For more information, please call 800.221.0216 or visit us at www.servicechamp.com.

Part# 00222

Frequently asked questions

RED ANGEL

Will Red Angel clog or damage a recovery unit? No, Red Angel gets reclaimed with the oil and will not clog or damage any part of the recovery unit. Guaranteed.

How does it work? Red Angel is inert in the system. It is activated by a refrigerant charge, system pressure, and flow velocity at the leak point. Once activated Red Angel forms a flexible chemical weld repairing the leak.

How large of a leak does it repair? Red Angel will seal leaks in A/C systems that can hold 5 inches of vacuum for 25 minutes or 15 inches of vacuum for 5 minutes.

Does it seal evaporator leaks? Yes. It also seals leaks in connection hoses, gaskets, o-rings & condensers.

How much do I use? Use one can (4.5 oz.) for all automotive A/C systems (up to 5 lb. system). When adding Red Angel to an evacuated system, substitute Red Angel for 2 oz. of oil. When a vehicle has a slow leak & maintains a partial charge, add 4.5 oz. of Red Angel along with the necessary amount of R-134a (see service manual).

How long will it stay in the system? Red Angel creates a permanent seal. Unused product will remain in the system acting as a lubricant.

What happens if I recycle the refrigerant? Red Angel is removed from the A/C system with the refrigerant. It is then separated from the refrigerant with the reclaimed oil.

Can I install it without an oil injector?

Yes, Red Angel is fitted with a coupler that is attached to the A/C low side service port. Once connected, and with the vehicle running, fully dispense contents of the can.

Part # 00222

"139 cans sold last year. Love the margins and success rate."

Roberto - Miami, FL

"Sold over 700 units with no complaints and no compressor or recovery system issues."

Joe C. - Rochelle Park, NJ

"I have used the Red Angel product on over 10 vehicles, all of which were successful. Great product!"

Chris - Tyler, TX

"Finally a good A/C stop leak that doesn't hurt or clog the recovery machine."

Barbara - Tampa, FL

"This stuff really works!! I didn't think my A/C unit would ever work again and after following the simple steps on the bottle I had ice cold air flowing through my car!"

Mike - GT Auto Parts

"I am an A/C shop owner and have had great success with your product. We use it on all of our jobs!"

Dennis - St. Petersburg, FL

"The Red Angel product is great! It fixed my air conditioner and saved me a bundle of money!"

Carl - Horseheads, NY
